## FATAL ACCIDENT IN HARVEST FIELD.

Isaac Vipond, an old-time resident of the district, was the victim of a shocking accident whilst working in the grain field on his farm near Westcott on Friday last.

It is understood Mr. Vipond had two binders running, one operated by himself in the lead and the other following in charge of his hired man named Darou. Having been at work for some time both stopped to replenish their twine box. Apparently, the hired man had some little trouble with his, and leaving his horses standing where they were went to get the assistance of his employer, and whilst the two were discussing the problem, the second team from some cause or another ran away. Running down the field the team passed close to the other binder, and both men made an attempt to stop the horses. In the effort to do so, Mr. Vipond was knocked down, the binder passing completely over him, and inflicting terrible injuries. When picked up, however, he was still conscious, but apparently thoroughly realized the serious nature of the accident.

Medical aid was obtained as quickly as possible, and everything done to alleviate the suffering, but the injuries sustained together with the shock left Mr. Vipond with but a few brief hours ere death intervened, this taking place on Saturday at one p.m. The farm on which the accident occurred is on Sec. 6-31-3, about 12 miles west and two miles south of Didsbury, and was taken up by Mr. Vipond upon his arrival here in 1901 from Ontario.

In addition to his wife, the deceased leaves three daughters and one son. One of his daughters, Jessie, it may be remembered, died in February of this year at the early age of 21 years. Of those surviving, two of the daughters, Mrs. Kulbeck and Mrs. Ash, are residing in Montana, whilst Ada, together with her brother Allan, live at home.

The funeral took place from the Presbyterian Church at Westcott on Tuesday, the large attendance being sufficiently indicative of the respect and esteem in which deceased was held by his neighbors, no less than for the sympathy felt for the bereaved family.

Mr. Vipond was just over 61 years of age and due to his long residence was well known both in town and district, his death being keenly regretted by everyone.

## Didsbury Ships First Car of New Wheat.

To J. Brown, farming east of Didsbury, is given the honor of shipping out the first car of new wheat this season.

Lloyd Hehn claims the distinction of bringing in the first load on Sept. 19th, the sample grading No 2

Both consignments were delivered to the Wheat Pool elevator

## Binder Mutilates Three-year old Boy.

A pitiful accident occurred on September 22nd when Harold, the little son of Mr. and Mrs. Herman Popki, living west of Carstairs, was terribly injured by the blades of a binder. He had wandered unnoticed into the standing grain, and apparently was directly in the path of the approaching binder. His right thigh was cut almost through and the machine then evidently threw him around and dismembered his right arm.

He was brought into the Didsbury hospital and attended to by Dr. Clark, who amputated the arm. The saving of the leg, it would appear, is a very serious problem.

Report from the hospital this morning (Thursday) at the time of going to press states the little fellow is making fair progress.

## Wait!

**AND** see our Mackintosh Apple Car to arrive this week  
As usual, our price and quality will be **THE BEST.**

## Men!

We have a full range of Overalls, Shirts, Gloves, Socks, Blankets, etc.

Special prices on many lines of Shoes.

**LADIES!** New shipment of Ladies' Fall Hats — latest and smartest styles—to arrive any day.

# RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is the "best tea you can buy"—picked when only three days old—juicy, flavor-filled leaves. Now packed in Aluminum.

## General Outlook Is Encouraging

The latest preliminary estimate of the yields of the principal grain crops, issued by the Canadian Government Bureau of Statistics, based upon reports from all parts of the Dominion, predicts a wheat crop of 458,741,000 for this year, the second largest crop ever grown in Canada. The record crop was in 1923, which totalled 471,199,000 bushels. This year's wheat crop is estimated at 48,930,000 bushels more than last year's yield and promises an average yield per acre of 20.4 bushels per acre.

The three great grain growing provinces of Canada, Manitoba, Saskatchewan and Alberta, will produce 432,223,000 bushels of this year's total crop of wheat as compared with 383,440,000 bushels in 1926.

There has been considerable damage from rust this year in various sections of Saskatchewan and Manitoba, and when final threshing returns are in, the government's estimate may be considerably lowered. The Manitoba Free Press estimates the wheat crop of the three prairie provinces for the year 1927 at 424,312,125, which is some eight million bushels less than the government estimate. This paper's estimate of the oat crop of the three prairie provinces is also considerably lower than that of the government and in the final analysis may prove to be more nearly correct, as with the exception of Alberta and the western part of Saskatchewan, the oat crop has been rather disappointing. Rust and frost has caused a lot of damage. However, there can be no question but that this year's crop throughout the west will be well above the average.

A new high record of wheat production has been established in Alberta this season with a crop now estimated at 168,862,000 bushels, an increase of 24,028,000 bushels over the previous bumper crop grown in 1923. But not only wheat promises a bumper yield this year; oats, barley, rye and other grains as well as the whole range of field and orchard crops promise record returns. The 1927 crop of 16,524,000 tons of hay and clover from 19,187,836 acres is the largest yield ever recorded in Canada.

The yield of oats has also been good with an estimated production of 502,199,000 bushels, of which 322,491,000 bushels were produced in the Prairie Provinces. Particularly good crops are being harvested in both Saskatchewan and Alberta and the estimate for the Prairie Provinces is the second largest shown. In 1923 it was estimated that 531,756,000 bushels were harvested in Western Canada. The 1927 production of barley is expected to be 98,000,000 bushels, and rye 17,462,000 bushels.

Though good weather is still required for the completion of threshing operations, these have now advanced so far that over a considerable area threshing is finished. There is naturally a feeling of optimism among Canadian farmers and business men. Not for years has the general outlook been so encouraging in Canada as it is at present.

## Japanese Royalty Engaged

Heir To Japanese Throne Is Betrothed To Daughter Of Prince

Prince Chichibu, 25, brother of the Japanese Emperor, and next in line to the throne, is reported betrothed to Mahiko Ichijo, 17-year-old daughter of Prince Ichijo, says a Tokio despatch to the Evening News.

Prince Ichijo is chief ritualist of the Imperial Court and a member of the ancient Kido nobility.

The despatch says that an early engagement of the Prince is urged by court dignitaries and the lack of a son in the emperor's family (a second daughter was recently born) is felt to make the early marriage of Prince Chichibu desirable.

The first step is often so expensive that you can't afford to take the second.

## Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 20 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

*Wm. H. Fletcher.*

## Lignite Utilization Board

Plant At Bismarck, Saskatchewan To Be Remodelled

Official announcement has been made by the minister in charge of the Bureau of Industries of the Government of Saskatchewan that the plant of the Lignite Utilization Board at Bismarck, Sask., has been acquired by the organized western Dominion Collieries Company of Winnipeg, which company will remodel the plant for commercial operations at the earliest possible date. Negotiations looking to this end have been carried on for some years following the experiments by the board from 1919 to 1923.

## This Wonder Liquid Dissolves Corns Quickly

Makes them shrivel up, makes them drop off, makes your sore toes well in a day or two. Relief is instantaneous. Paint on a few drops of Putnam's Corn Extractor tonight—see how well your sore corns feel in the morning. It's a wonder liquid—a marvel-worker. Nothing so good for sore corns as Putnam's Corn Extractor. Get Putnam's from your druggist—today. Satisfaction guaranteed.

## Saskatchewan Furs

The total estimated amount of money paid trappers of Saskatchewan for the many kinds of fur they brought in in 1926 is \$1,366,706. The number of furs brought in was 650,742 the greatest being muskrat number 433,858 with a value of \$580,629, and the next coyote with 30,475 pelts worth \$274,275.

## DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.I. No. 6, Simcoe, Ont., writes: "Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## Ship Hens For Egg Contest

First Canadian Entry Left Vancouver Recently For England

The first Canadian entry to the International egg laying contest, which will open at Preston, Lancashire, England, shortly, left Vancouver in a specially equipped express car over the Canadian National Railway. The shipment was made up of thirteen white leghorns from the pens of Farrington Brothers, Burnaby, under the supervision of Prof. E. A. Lloyd, of the University of British Columbia.

During the long journey sufficient British Columbia apples were being carried to furnish each bird with one daily.

## Sacking Ship For Commander Byrd

Arriving at Oslo, Norway, Lieut. Bernt Balchen, of Commander Richard E. Byrd's trans-Atlantic crew, answered as follows to an inquiry as to the purpose of his visit: "Commander Byrd asked me to come to Norway and find a ship which he intends to send to the Ross barrier this winter for reconnaissance before he starts the great antarctic expedition next year. In addition to the ship my task also is to find equipment and men, especially skiers, who are ready to leave for the Antarctic this autumn."

## Alfalfa Meal Mill

Edmonton interests are looking to the possibility of establishing an alfalfa meal mill at Lethbridge, for the grinding of alfalfa and the making of mill feeds with ground alfalfa and syrup by products from the Raymond sugar factory as a basis. The extending acreage of alfalfa in the irrigation districts about Lethbridge has roused this interest.

Relieves Sore Throat—Minard's Linctament.

## Some Highways Over-Signed

Directions Necessary Only Where Road Is Doubtful Or Dangerous

"Signing the highways" has long been a topic for departmental consideration. Some have done little, others a good job, and some have "over-signed" their highways.

We read in newspapers of patients who take an overdose of doctor's medicine and die. The motorists in some localities are in the same position—overdoses of "signs" cause near death to many good trips, and travelling is "hard work."

Whoever is in charge of signs in your highway department should study the situation carefully, and erect signs at every place where the motorist can go wrong or is in danger. No other directions are necessary. One sign correctly placed is better than ten signs placed "hit or miss."

## Is Efficient Store-Keeper

Blind Man At Salt Lake Expert In Distinguishing Coins

Charles A. Larson has been blind for 16 years, but he conducts his grocery store at the Salt Lake tourist park as efficiently as though his sight was unimpaired. His wife and two daughters assist at times, but he is not dependent upon them. Every commodity is put in a designated place and Larson is able to walk to any part of the store, select the article wanted by the customer, and return to the counter. He is an expert in distinguishing coins and has no difficulty in making change. Scores of tourists have bought supplies from him without learning of his affliction.

## Manitoba Make Binder Twine

Five hundred acres of hemp are under cultivation within a radius of five miles of the plant of the Manitoba Cordage Company at Portage la Prairie. This year the company has been experimenting with binder twine and, according to report, certain farmers are being supplied with a number of bales for trial purposes, to report on its quality after use.

## A Praiseworthy Hobby

Giving away flowers to the sick has been the hobby of a man of Greenville, South Carolina, for the past twenty years. He estimates he has given 80,000 bouquets to the sick. Now a man of sixty-six years he spends early morning and evenings in his flower garden. Each Sunday he picks the flowers in bloom and makes his weekly round of Greenville hospitals and sick beds.

## FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to praise anything which brings health and comfort to their little ones—any medicine that will make the baby well and keep him well will always receive hearty recommendation from the mother. That is why Baby's Own Tablets are so popular. Thousands of mothers, throughout the country, not only use them for their own little ones but are always delighted to be able to recommend them to other mothers. Thousands of mothers have proved Baby's Own Tablets to be without an equal in relieving their little ones of any of the many minor ailments which arise out of a derangement of the stomach and bowels. Baby's Own Tablets are the ideal laxative—easy to take but thorough in action. They banish constipation and indigestion; break up colds and simple fevers; expel worms and make the teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The fastest moving living creature is the deer or bot fly of North America and Europe. Entomologists say it can fly at the rate of 185 miles an hour.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

If you would retain a man's friendship don't try to show him that he isn't half as smart as he thinks he is.

It's an easy matter to get around any one you can see through.

Proved safe by millions and prescribed by physicians for

Colds Neuritis

## WARNING!

Beware of Counterfeits

There is only one genuine "ASPIRIN" tablet. If a tablet is offered as "ASPIRIN" and is not stamped with the "Bayer Cross"—refuse it with contempt—it is not "ASPIRIN" at all! Don't take chances!

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic-acid of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

## COSGRAVE MAY CARRY ON FOR ANOTHER YEAR

Dublin. — President Cosgrave's Free State government, despite the disappointing outcome of the parliamentary elections, intends to carry on with the expectation of at least a year of life. In making this announcement, Hon. Ernest Blythe, vice-president of the council, stated that a new loan will be floated in December.

The ministers, all of whom were re-elected, are confident, it may be taken from this, that when the new Dail convenes October 11, it will approve the continuance of Mr. Cosgrave as president of the council and that he will accept the mandate.

There is no doubt, observers say, that such an outcome would meet with the wishes of the business community throughout the Free State, regardless of political affiliations.

It is realized, however, that the administration will have to go warily and that its success will depend upon how far it is able to carry with it one or more of the smaller groups in the Dail. Although the farmers, with six deputies, and the independents with twelve, are commonly ranked as government supporters in the Dail, their attitude is not one of solid adhesion.

In fact, P. F. Baxter, leader of the Farmers' Party, who lost his seat in the election, is quoted as saying at Cavan recently that as President Cosgrave had not secured a definite mandate from the country the alternative was to make way for the Fanna Fail and give Eamon de Valera a chance to prove his policy practicable.

There is a suggestion that Mr. Cosgrave may offer a government portfolio to a member of the Farmers' Party and that in this case the party would vote solidly for him.

## League May Meet In Ottawa

Canada Planning To Invite Council To Meet Here

Geneva.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to sit at Ottawa. In fact there is a projected scheme to have the whole League assembly meet there in order to give American newspapermen and League sympathizers a ready occasion to study its workings at first hand. This project is still in abeyance. It seems certain that one of the council's meetings in the near future will be held in Berlin.

The Maharajah of Kapurthala, one of the chief reigning princes of India, would like to see a session of the League council held in Delhi, India's capital, at some not too distant date.

Speaking to a correspondent to day, he asserted the governing classes in India are doing all possible to interest their people in the aims and aspirations of the League.

## Wheat Pool and Prices

Pool Will Not Be Used To Boost Prices To the Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pools to boost the price of wheat, Hon. W. R. Motherwell, federal Minister of Agriculture, told the convention of the Bread and Cake Bakers' Association in session here. Hon. Mr. Motherwell spoke on "Cooperation" and said the wheat pool was by far the best measure which had ever been taken by the farmers for their own prosperity and consequently for that of the entire country.

It would be virtually impossible, he said, for Canadian farmers to hold wheat for any length of time with a view to raising the price. Outside competition was too great from the point of view of exporters, he said.

## Plane To Carry Sixty Passengers

Paris.—Charles A. Levine is planning to return to the United States on October 11 with three French engineers, with the intention of building a huge airplane capable of carrying sixty passengers across the Atlantic in regular flights, one of his closest advisers stated here. No further details of this project could be obtained.

## Freight Rates Case

Reasons For Freight Cut Are Given By Board

Ottawa.—Reasons for judgment in the general freight rates case were made public by the Board of Railway Commissioners. The judgment itself was handed down on August 25 following an extensive investigation of railway freight rates throughout the Dominion. The judgment provided more or less extensive reductions in rates on grain and other commodities for export.

The reasons issued recently cover 200 pages and review in detail the hearings in the different parts of Canada, together with the conclusions arrived at by each of the commissioners. In the main, Chief Commissioner H. A. McKeown, Assistant Chief Commissioner McLean, and Commissioners Vlen, Boyce and Lawrence are in agreement on the main points covered in the August judgment, namely: Transcontinental rate scale; terminal tariffs; different standard mileages, East and West; and domestic grain rates to British Columbia.

Commissioner Oliver submits a number of conclusions differing somewhat from those of other members on the board. A schedule dealing with 50 various individual applications is being prepared and will be issued by the board within the next week.

## Impressed With Canada

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion

Ottawa.—Count Gottfried Von Bismarck, a tall, blonde, good looking young German, whose grandfather, Prince Otto Eduard Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Chicago to spend the next few days in the capital. Count Bismarck is interested particularly in agriculture and he visited the Dominion Experimental farm here.

The young count has seen something of the Canadian west, as from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested in the operations of the Canadian wheat pools and the Winnipeg Grain Exchange. He was impressed also with the extent to which machinery is used on the western farms—for more, he said, than in Germany, where farms were smaller and labor less expensive.

## Silk Train Wrecked

Valuable Cargo Tumbles Down Embankment When Train Leaves Rails

Vancouver.—Raw silk valued at \$2,500,000 was lying in the Fraser River and on the bank of the stream near Yale, east of here, as the result of the wreck of a Canadian Pacific Railway special silk train travelling east. The train, consisting of 18 cars destroyed telegraphic communication along the Canadian Pacific Railway track, when ten cars lurched down the bank.

Five cars tumbled into the turbulent waters of the Fraser River, while the five others were arrested in their fall by rocks and trees.

## Suspend Code Sub-Section

Regina.—That subsection of the criminal code which forbids an alien to be in possession of a shot gun, rifle or ammunition is to be suspended in so far as it relates to the Northwest territories the Gazette notifies. The suspension is brought about by representations of the R.C.M.P. that to prohibit such weapons would be to deprive trappers of their means of livelihood. There were other considerations too.

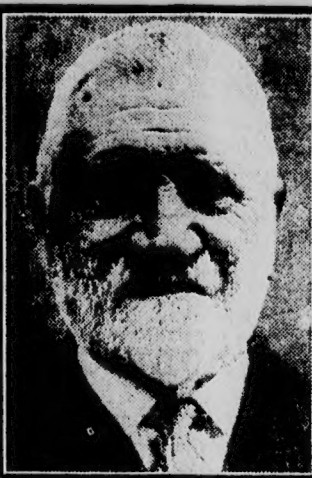

## Study Einstein's Theory

Geneva.—Two Belgian scientists, Professor Piccard and Dr. Stahel, have installed a physics laboratory on the summit of Rigi-Kulm, 5,905 feet above Lucerne. Their object, especially, is to make a study of Einstein's theory of relativity. American and English scientists are invited. It was said to visit the new laboratory.

## U.S. Ambassador To Mexico

Washington.—Dwight W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Washington Government has obtained the Mexican Government's sanction of the selection. The post has been vacant since Ambassador Sheffield resigned last July.

## Will Attend Convention

Acton Burrows, Toronto, Ontario, will be an interesting delegate at the Dominion Conservative party convention in Winnipeg. He was one of the secretaries at the Conservative convention in 1878—nearly half a century ago—when Sir John A. Macdonald's famous national policy was launched and he has the original of the resolution that was passed on that historic convention.

## To Aid In Defence

New Zealand To Help Pay Expenses Of Singapore Naval Base

Wellington, N.Z.—Premier Coates introduced in the House of Representatives the government's naval defence proposals, of which the chief feature is a contribution by New Zealand to the Singapore naval base.

The premier said that the proposals would bring New Zealand's expenditure on naval defence up to ten shillings (about \$2.50) per capita.

No affront to Japan was contemplated in any way by the construction of the Singapore base, he said, adding that Japan's action in the great war had been unforgettable, especially the visit of Japanese warships to New Zealand waters to assist in the conveying of troops.

Considering the long trade routes to be defended by Great Britain, Premier Coates said, New Zealand was going to shoulder a fair share of the imperial budget.

The proposals were adopted by the house 51 to 10.

## Receive Higher Wages

Berlin.—Instead of taxing bachelors, Germany is considering paying bachelor employees of the government more than the married men. At a conference in the foreign office regarding a nation-wide increase in wages, the minority report asked higher wages for bachelors because living is more expensive for them, as they have no wives to cook for them and spend much more on amusements.

## Protest Tariff Change

Manufacturers Of Cutters and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of buggies and cutters protested to the tariff board against the application of the Consumers' League for a reduction of the duty on these articles. The manufacturers asked that the present duty be retained and that the sales tax be removed. This would save the purchasers \$4 to \$6 on buggies and \$1.50 to \$3 on cutters. Approximately 3,200 buggies were sold in Canada every year, it was stated.

R. J. Beachman, of the Consumers' League, argued that the existing tariff was more than enough to protect the industry. A buggy that cost \$96 in the United States cost \$109 in Canada. The Canadian industry, he said, had a pretty full measure of protection.

## Mission School Tragedy

Grey Nuns Sister and Nineteen Children Perish In Flames

Big River.—Death and desolation today stalk in the frontier outpost of civilization at Beauval, a hamlet 120 miles north of here.

There the bodies of 19 children ranging in ages from six to twelve and that of a woman lie waiting for a coroner's investigation. All were victims of a midnight blaze that swept the Roman Catholic mission.

From the meagre details the fire swept the three-story frame building with such rapidity that in three or four minutes the entire structure, tinder like, through lack of rain for some time, was enveloped.

The victims are 19 pupils of the school and Sister Lea in charge of the dormitory where the fire was first discovered. In addition, a priest was so badly burned in the rescue work that he is not expected to live.

Forty-six children were saved from the inferno.

The fire is believed to have started in the centre of the building, close to the furnace, and spread towards the boys' dormitory.

## To Set Slaves Free

New Ruling Gives Liberty To Slaves In Sierra Leone

London.—A new ordinance will be introduced in the legislative council of Sierra Leone, British protectorate on the west coast of Africa, which will have the effect of entirely freeing all the slaves in the protectorate after January 1, 1928. The new ordinance is the result of conversations between the British Government and the Sierra Leone Government.

Approximately 220,000 slaves will be able to leave their masters should they desire to do so as soon as the ordinance becomes a law. It was stated in official circles.

## SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been hovering over the head of Christian Rakovsky, Soviet ambassador to France, has burst at last. Le Matin announces that France has officially informed the Moscow government that Rakovsky's recall is an indispensable condition for a non-aggression pact with the Soviets.

Furthermore, the French ambassador, M. Herbet, was instructed to say the Soviets must give practical proof of their intention to live up, both in spirit and in letter, to their solemn undertaking, entered into in 1924, to abstain from all interference with France's internal affairs, by ordering their agents and those of the third or communist international, to cease activities in France.

In addition, France requires that the Soviets take active steps to bring to a conclusion the long drawn negotiations for settlement of Russia's debts to France.

Only when these conditions have been scrupulously fulfilled, Mr. Herbet was instructed to say, will France consent to open negotiations for the treaty of non-aggression recently proposed by the Soviet government.

The latest Franco-Russian crisis, thus brought to a head, began when Ambassador Rakovsky signed, as a member of a Russian communist party committee, a manifesto urging the soldiers of all nations to mutiny and overthrow the Bourgeois governments.

This raised a storm of protest in France and repeated representations were made to Moscow. Foreign Minister Tchitcherine, of the Soviet Government, at first disapproved, and then formally disavowed M. Rakovsky's action, but took no steps to recall him.

Instead, Tchitcherine offered to enter into a treaty of non-aggression and non-interference in internal affairs.

## Three-Motor Plane Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite vigorous denials by directors of the Junkers Aeroplan Works, it was learned from an unquestionable source that the G-24, a three-motor plane, has been made ready at Malmo, Sweden, for a trans-Atlantic flight and may arrive at any time at Norderney, the North Sea Island which was a German airplane base during the war.

The plane, it was learned, will be piloted by Friedrich Loose, one of the Bremen's pilots on the recent unsuccessful Junkers trans-Atlantic venture, and by Herr Starke, who is regularly employed at Lufthansa's test station at Kiel, but who has taken a leave of absence to make the trans-Atlantic crossing.

The flight is planned to proceed in stages by way of Lisbon and the Azores, and then probably to Bermuda, although it is possible that the route may shift to Newfoundland.

Dessau, Germany—Junkers' officials here said that a type of their G-24 machine was ready for a trans-Atlantic flight to the United States, but insisted that the Junkers Corporation had nothing to do with the project.

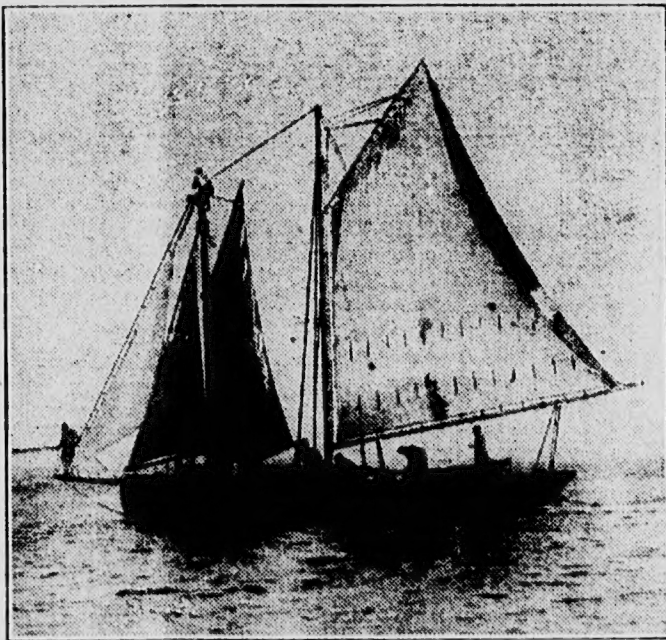

They stated that they had merely sold the plane some time ago to a north German undertaking.

## Canada's Auto Production

August Increase Fifteen Per Cent. Over July Output

Ottawa.—Production of automobiles in Canada during August totalled 12,526 cars, an increase of 15 per cent. over the output of 10,887 units in July, which was the lowest month this year, but 18 per cent. under the 15,261 cars reported for August of a year ago.

Production in August of this year included 2,485 open passenger cars, 7,003 closed passenger cars, 2,322 trucks and 716 chassis. Of the 716 chassis, 651 were intended for passenger cars, 12 for trucks, and 53 for either passenger or freight service.

## Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the phases of Canadian activity did not end as the Canadian Pacific Empress of Scotland steamed out of the harbor of North Sydney recently towards the Premier's homeshores. When only a short way out a seventy-five year old whaler seen above crossed the bows of the huge liner for the purpose of demonstrating to the Premier just how their operations are carried out. The photograph shows

the old whaler off the starboard side of the Scotland. One fisherman is perched on top of the mast as the lookout while the harpooner is seen poised on the sail spar in front with the harpoon in hand.

The Empress of Scotland, bearing the helm of the British state home to England from his Canadian tour, was the largest ocean vessel ever to enter the harbor of North Sydney.

## LOCAL AND GENERAL

Mrs. Cressman returned this week  
from a visit to Stavely.

Mrs. J. Herber returned on Monday  
from Castor, where she had been at-  
tending D. S. Shantz's golden wedding  
anniversary.

H. F. Lewis, manager of the Wheat  
Pool elevator here, spent the week-  
end with friends in Lacombe.

Willie Teskey arrived from Calgary  
and with two friends from Lomond  
and Carseland spent the week-end  
with his parents. Mrs. W. Teskey  
with her daughter Helen accompanied  
the young men back to Calgary on  
Monday.

The town of Taber voted 48 for and  
none against in favor of the electric  
light proposition submitted by the  
Calgary Power Co.

The arrival of a car of Pontiacs and  
the purchasing of wagons by our busy  
farmers gives Teskey's garage a busy  
appearance just now.

All elevators will be closed on Sun-  
days. This order is broadcast by the  
A.P.P.

Miss Wolfe, of Acadia Valley, Alta.,  
formerly of Didsbury, was the guest  
of Mrs. Keith last week.

Mr. and Mrs. Gole, of Bridgeport,  
Ontario, are visiting with Mr. and  
Mrs. M. Weber.

Mrs. Andrew Weber is reported to  
have been very sick last week.

Mr. and Mrs. J. McCloy returned

last week from a visit to their parents  
at Brandon and Minnedosa respec-  
tively.

Jack Pearson is leaving this week  
for a course at the Edmonton Uni-  
versity.

Miss J. Shantz has taken a position  
as stenographer at J. V. Berscht's  
store.

Frank Kitley, formerly of Didsbury,  
arrived from Ridgeway, Ontario, and  
is staying with Mrs. P. H. Lantz and  
renewing old acquaintances in the  
district.

Mr. and Mrs. W. Derby returned  
last Friday from a very enjoyable  
trip to the Okanagan, the entire jour-  
ney being covered by auto.

St. Cyprian's, Church of England.  
The harvest thanksgiving service is  
postponed until a later date, which  
will be announced.

Mrs. G. Peters, of New Westmin-  
ster, B.C., was the guest last week  
of Mrs. W. G. Liesemer. At one time  
Mr. Peters was one of Didsbury's  
business men, leaving here about sev-  
enteen years ago.

E. G. Ranton, of Edmonton, suc-  
cessor to J. Huget, arrived and took  
charge of the store here last week.  
His family will remain in Edmonton  
until a suitable residence has been  
obtained in Didsbury.

A. M. Watson, son of G. Watson of  
our local boot repair establishment,  
left here last week en route to Sex-  
smith, Grande Prairie, where he has  
accepted a position with the Royal  
Bank.

Mr. and Mrs. Stevens, accompanied  
by their son Jack, returned last week  
from a visit to Salem, Oregon. Jack's  
wife will remain at Los Angeles for  
a few months.

The rates for hail insurance car-  
ried under the municipal plan for  
1927 have now been set by the Hail  
Insurance Board of Alberta. A state-  
ment by A. H. Tovell, the manager,  
shows the volume of business written  
increased almost 40 per cent. com-  
pared with last year,—1,139,000 acres  
being insured in 1926, and 1,551,000  
in 1927.

The losses in 1926 amounted to  
\$680,000 while the losses for 1927 are  
slightly under \$2,500,000, a loss ratio  
of 17 per cent.

There were 10,407 applicants for  
insurance and more than 5,000 of  
these were claimants.

Mr. Tovell stated that after using  
practically all of the reserve fund  
built up in the last eight years, the  
board still found it necessary to set  
rates in some portions of the provin-  
ce higher than ever before.

It was announced at the offices of  
the Alberta Wheat Pool on Saturday  
that the pool had now purchased the  
British-American Grain Company's  
elevator at St. Paul de Metis. This  
now makes 155 elevators at various  
country points owned by the pool.

Within the last month hundreds of  
motorists on Alberta roads have been  
brought face to face with a safety  
problem which cannot remain ignored  
by government and municipal auth-  
orities if serious mishaps are to be  
avoided in the future. This problem  
is that of the farm binder being  
transported along roads at night.  
These implements take up a consid-  
erable portion of the roadbed and are  
difficult to see even with the best of

# Radio

**B Batteries, Dry Cells, Tubes**  
ALL ON HAND.

**Get your Radio Repaired**  
BEFORE WINTER, & THE BIG FIGHT

**C. F. DOOLEY Phone 64**

headlights. Farmers on the whole are  
cautious in the moving of these mach-  
ines along roads in the dark, but the  
problem probably cannot be met ex-  
cept by legislation requiring lights  
to be carried not only on binders but  
on threshing outfits.—Exchange.

Mr. T. E. Larson of Calgary will  
continue his class in piano studies.  
Those wishing to take lessons write  
or phone Mrs. (Dr.) J. L. Clarke.

The following were attending  
Mr. and Mrs. D. S. Shantz's gold-  
en wedding at Castor last Sunday  
—Mr. and Mrs. Mel Shantz and  
daughter Ruth, Mr. and Mrs. A.  
Traube and son Harley.

Mr. R. W. Palmer, expert tailor  
will be at J. V. Berscht's store on  
Wednesday, October 5th, with a  
new range of Hobberlin samples  
for the fall.

Mr. and Mrs. B. T. Farrell of  
Edmonton visited at the home of  
Dr. and Mrs. Clarke over the week  
end. This week there are visiting  
at the same residence Mr. and Mrs.  
R. A. Fleming of Toronto.

## Of Interest to Early-Risers.

Morning service of Didsbury's  
electric light plant will commence  
on October 1st.

## PRESENTATION AT THE RODNEY HOME.

On Tuesday, September 27th, the hos-  
pitable home of Mrs. Rodney, Spring-  
side, was opened to about fifty guests  
from the district and town, gathered in  
honor of Miss Dorothy Orde, one of  
Springside's popular young ladies.  
Music, cards and social talk helped to  
make a very pleasant evening. The  
Misses Wilson, Mr. C. Stader, and Mr.  
L. Holmes supplied excellent music for  
dancing, which many enjoyed. After a  
dainty lunch served by the hostess, Miss  
Orde was presented with many gifts of  
linen, glass, china, etc., all attesting the  
esteem in which she is held in the com-  
munity. Then the bride-to-be thanked  
her friends in a few well chosen words.  
After singing "For she's a jelly good  
fellow" and "Auld Lang Syne" the  
guests departed, thanking Mrs. Rodney  
for a very enjoyable time.

## Here and There

The west will require 25,000 men  
from Eastern Canada to assist in  
gathering the grain crop this year.  
In all about 67,000 men will be re-  
quired to complete the work. Ar-  
rangements have been made by both  
railroads to handle the harvesters.

No Canadian agricultural honor  
has come at a more propitious time  
than the award of the silver medal  
"for outstanding excellence" to the  
Canadian exhibit of tobacco pre-  
pared by the tobacco division of the  
Central Experimental Farm at Ot-  
tawa at the Tobacco Exhibition held  
at Olympia, London, England, in  
May. The Canadian product came  
into competition with that of South  
Africa, North and South Rhodesia,  
India, Colombia, Italy, Greece and  
Macedonia, thus consolidating the  
position previously held by Canada  
as expert opinion as the producer  
of the best tobacco in the British  
empire.

Leave your printing at home.

T. O. F. Herzer, manager of the  
Canada Colonization Association,  
states that this organization has  
placed 400 Old Country families in  
the Prairie Provinces this year and  
that 800 other families will arrive  
before the end of the year.

The fourth annual ride of the  
Trail Riders of the Canadian Rock-  
ies, an organization with a mem-  
bership including many prominent  
artists, writers and society leaders  
in all parts of Canada, U.S. and  
Europe, left recently from Banff  
over a new trail for Mount Assini-  
boine.

A shipment of 1,400 horses pur-  
chased in the Prairie Provinces for  
the Russian Government moved to  
Quebec over Canadian Pacific lines  
recently. In addition to the 27 car-  
loads already moved to the east a  
special train of 17 cars passed  
through this city en route to the  
Atlantic coast. The horses in the  
latter shipment were all purchased  
at Alberta points.

Following upon his recent an-  
nouncement to the effect that a To-  
ronto firm of architects would be  
employed in connection with the  
erection of the new Canadian Pa-  
cific Hotel in that city, E. W. Beatty,  
Chairman and President of the  
Canadian Pacific Railway, recently  
stated that Messrs. Sproatt and  
Rolph had been appointed asso-  
ciates with the firm of Ross and  
Macdonald, of Montreal, to handle  
this work. Messrs. Ross and Mac-  
donald have been employed in Cana-  
dian Pacific work for some time, the  
latest of their buildings being the  
company's new hotel at Regina. It  
is desired that the new hotel shall  
be thoroughly representative of the  
city in which it stands and the ap-  
pointment of a firm of Toronto  
architects is made to further this  
purpose.

Members of the newly-appointed Saint John Board of Harbor Commissioners visited in Montreal recently to confer with officials of the Canadian Pacific regarding needed changes and improvements in the harbor facilities of Saint John. Several suggestions advanced by the railway company will be acted upon before the winter traffic begins, according to the Hon. W. E. Foster, president of the Commission.

Interest taken by American Railway officials in the latest achievements in the way of Canadian locomotive construction is emphasized by the fact that the Canadian Pacific Railway Company has been invited to send their latest and most powerful passenger engine to be placed on exhibit at the Centenary Exhibition and Pageant being held by the Baltimore and Ohio Railroad at Baltimore, September 24 to October 8. The C.P.R. "2300" engine, their latest and finest passenger type, will be sent to Baltimore.

The first ticket issued from the new Union Station at Toronto over Canadian Pacific lines was enclosed in a special leather folder, upon which appeared the name of His Royal Highness, the Prince of Wales. The three tickets following were issued to H.R.H. Prince George, Premier Stanley Baldwin and to Mrs. Baldwin. The new union station was formally opened by the Prince of Wales, the Royal train being the first to steam into the new depot.

A cable received at Ottawa by the Department of Trade and Commerce from Harrison Watson, Trade Commissioner for Canada in London, indicates that Great Britain will offer an attractive market for the Dominion's exportable surplus of timothy and clover during the present year. The cable reads as follows: "English hay crop turning out so badly that imported hay will be required. Prospects are that there will be a fair demand for Canadian timothy and clover mixture."

Use our miscellaneous advt. column. It will pay you.

The 100 members of the British Newspapers' Society left Canada thoroughly impressed with the opportunities Canada possesses. Their impressions are that Canada was already great and is potentially much greater, and they were amazed that so much could have been accomplished in Canada in such a short time by so few people. They sailed from Montreal on the Canadian Pacific Steamship "Montclare," the ship having a large passenger list.

After a strenuous six weeks travelling across the Dominion of Canada, Their Royal Highnesses, the Prince of Wales and his brother George, embarked on the Canadian Pacific Flagship, the "Empress of Scotland," tired but happy. Prince Edward says, "Every time I come to your country I am more and more attracted by the wonderful natural scenery and the warmth of the welcome extended by Canadians, and trust that it will not be long before we meet again."

Approximately 1,000 members of the American Legion visited Montreal on their way to Paris, France, where they will hold their 9th annual convention. The people came from Idaho, Buffalo, Wisconsin, Washington, Montana and North and South Dakota. Frank X. Schwab, mayor of Buffalo, gave the Legionnaires of that city a wild buffalo to be presented to the citizens of Paris. They crossed to Antwerp on the "Montclair" and "Montroyal," both liners in the Canadian Pacific service.

"A land of good wages and unlimited possibilities," is the manner in which Premier Stanley Baldwin characterized Canada in his first public address in the Old Country after his return from the Dominion. Ninety-five per cent. of the men (of whom we hear too much) who go out to the Dominion and fail, owe their failures to themselves. I have no doubt that a man can succeed on the land there even if he has not been brought up in the country at home. A little training will go a long way."

**now-**

**makes Warm Air Heating  
the most efficient system  
known to Science!**

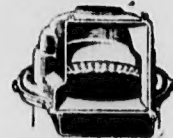

**A**MONG heating experts warm air is known as the most healthful and economical form of domestic heating. It fosters health—gives winter-long comfort. It costs about one-half that of other systems. Yet, because so many warm air furnaces are unscientifically installed, thousands of householders are not getting the results they should.

How can this condition be remedied?

The answer is "Code Installation". A "Code Installed" Warm Air Heating System is a system installed according to tried and proven scientific principles. There is no guesswork. "Code Installed" warm air guarantees an unfailing abundance of moist, circulating healthful heat—seventy degrees in every room during sub-zero weather.

McClary's are the only Canadian members of the National Warm Air Heating and Ventilating Association—an association which has adopted a scientific code for installing warm air furnaces. By insisting on a McClary's "Code Installed" Sunshine Furnace you are guaranteed a heating system which costs less to buy and less to maintain than more elaborate systems—yet provides 70 degrees of heating in every room.

**Ventiblast**

McClary's Ventiblast is an exclusive feature of McClary's Sunshine Furnace, which burns soft coal equally as well as hard coal, coke or wood. It mixes pre-heated air with soft coal gases and converts them into flame—thus eliminating soot, waste and dust.

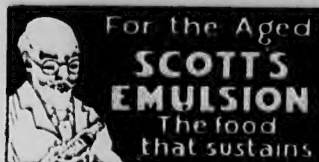

Fill in and mail attached coupon, and we will send you name and address of the nearest McClary's dealer who will guarantee a "Code Installed" heating system which will give lifetime satisfaction.

**MAIL THIS COUPON**

## WORLD HAPPENINGS BRIEFLY TOLD

**Peter Verigin, the younger, has arrived from Russia to assume leadership of the Doukhobors in Canada.**

The Canadian Government has proposed to Poland, conclusion of a treaty of commerce and it is understood that negotiations will begin shortly.

Admiral Baron Sadakichi Kato, who commanded the Japanese fleet during the siege of Tsingtao, China, in the World War, is dead. He was a former chief of the Japanese naval board of education.

Dr. Edward Sapir, Canadian anthropologist, has been appointed to a full professorship at the University of Chicago, where he is in charge of the department of sociology and anthropology.

Five new commissioners for oaths have been appointed in Saskatchewan. They are: Peter Gross, St. Bonaventures; William H. Bruce, Kisbey; John F. Malouhney, Hobbist; Hugh Ellis, Saskatoon, and Walter W. Robertson, Saskatoon.

The memorial to Lieut. Richard Douglas Sandford, V.C., who drove the submarine G3, loaded with 15 tons of high explosive, into the pile work of the mole at Zebruggo and blew a breach 150 feet wide, has been unveiled on the mole in Belgium.

Commander Richard E. Byrd says that he plans to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

More than 1,243,600 gross tons of shipping, consisting of 656 motorships and steamers and 192 sailing vessels of 100 tons or more, were lost, broken up or condemned throughout the world in 1926, according to the annual wreck statistics report of Lloyd's Register of shipping.

Definite announcement was made at Calgary, Alta., that the Russian Government has renewed arrangements for purchasing 4,000 horses in Western Canada, including British Columbia. The animals will be of a higher standard than those shipped last year, and higher in price.

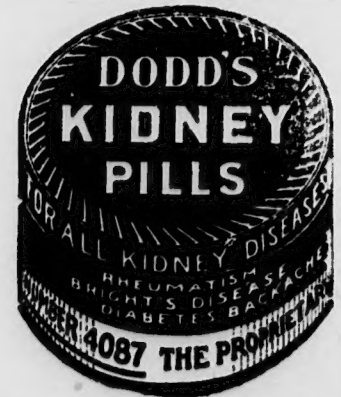

Homestead entries for the first five months of the present year in the four western provinces total 2,261, as against 2,381 for the corresponding five months of last year. Saskatchewan heads the list with 1,038 entries, followed by Alberta with 913, Manitoba with 273, and British Columbia with 37.

**When Asthma Comes** do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

The highest railroad in the world is the Central Railway of Peru, which reaches an altitude of 15,684 feet and maintains a station of 15,685 feet.

**Minard's Liniment for Asthma.**

If the average man was as good as he thinks other men ought to be it wouldn't be long until his vanity made him topheavy.

W. N. U. 1700

## Beauties Of Natural World

People Who See Them More Than Fortunate Says Viscount Grey "Of all the joys of life which may fairly come under the head of recreation there is nothing more great, more refreshing, more beneficial in the widest sense of the word than real love of the beauty of the world," writes Viscount Grey in "Fallodon Papers."

"Some people cannot feel it. To such people I can only say, as Turner once said to a lady who complained that she could not see sunsets as he painted them, 'Don't you wish you could, madam?' But to those who have some feeling that the natural world has beauty in it I would say, cultivate this feeling and encourage it in every way you can. Consider the seasons, the joy of the spring, the splendor of the summer, the sunset colors of the autumn, the delicate and graceful bareness of winter trees, the beauty of snow, the beauty of light upon water, what the old Greek called the smiling of the sea."

When we are bored, when we are out of tune, when we have little worries, it clears our feelings and changes our mood if we can get in touch with the beauty of the natural world."

## Princess Enjoyed Joke

Princess Mary was among those who appreciated the joke when the band at a Manchester ceremony she was attending struck up the tune, "Let's all go to Mary's house." The Princess had just laid a foundation stone at Manchester Infirmary, and as she stepped down from the platform the song was played. At once some of the onlookers took up the refrain and sang lustily the words, "And let's have a real good time."

## Big Land Deal

Negotiations for the sale of 6,000 acres of land in the Madson district of Saskatchewan, 160 miles southwest of Saskatoon, were opened recently by the Canada Colonization Association, the purchasers being twenty Mennonite families, all in the Dominion but living in scattered districts.

A Modish Frock

Charmingly graceful is this attractive frock, having a tunic at each side of the slightly flared skirt. The bodice has gathers at the shoulders, a vestee and scalloped collar. The long sleeves are dart-fitted, loose, or gathered to wrist bands, and a wide belt is finished with buttons at the front. No. 1651 is in sizes 36, 38, 40, 42 and 44 inches bust. If the dress is made of one material only, size 38 requires 3 1/2 yards 39-inch, or 3 1/2 yards 54-inch material. Views A and B, size 38, require 3 yards 39-inch, or 2 1/2 yards 54-inch material for the dress, and 1 1/2 yards 39-inch, or 3/4 yard 54-inch contrasting. Price 20 cents the pattern.

## May Add Airplanes To Present Service

Matter Said To Be Under Consideration By C. P. R. Officials

Is Canada about to adopt the airplane as a supplement to the transcontinental flyer, on a commercial scale? Are the day and night cross country trips to be cut in half or third, as at present over a considerable section of Western Europe? Is air-mail for the Dominion an early development?

Immediate steps in these directions seems to be indicated by the movement being made to urge the Canadian Pacific Railway to add an air branch to its present service which, it is said, is being pushed by Major-General J. H. MacBrien, former chief of staff, General MacBrien is at present provisional chairman of the Canadian Air League.

It is expected that MacBrien will be placed in charge of the railway's aerial department, if it materializes. He is himself a licensed air-pilot, having taken the course at Camp Borden a year or so ago, and, in addition, has made an intensive study of aeronautics.

MacBrien's plans, it is said, have been studied and endorsed by C.P.R. officials. The railway is sounding out the federal government to see if it is prepared to assist in the early heavy expenditures by means of subsidies.

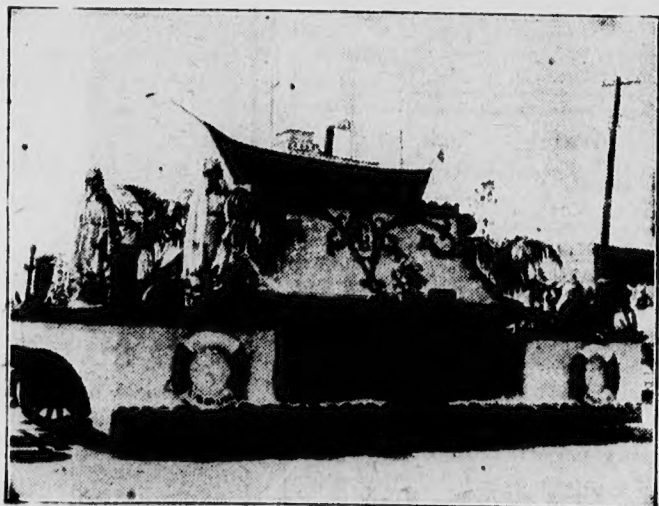

The announcement is being watched with the keenest interest, and there is much speculation as to whether the railway that was the pioneer in transcontinental development will also be a pioneer in this spectacular advance step for future transportation.

**A Corrector of Pulmonary Troubles.**—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

## Donates Flying Ambulance

A flying ambulance for the isolated inhabitants of Lapland, in Northern Sweden, has been donated by a Swedish railroad builder, on the occasion of his birthday. One aerial ambulance already has been maintained in Lapland for the last three years. From the frozen wastes, it has made many rescues, carrying patients to the military hospital at Boden, Sweden's chief stronghold on the edge of the Arctic zone.

For hunters of the south do not kill their quarry with firearms, but practice the hunt as do the English sportsmen.

## FIRST CUNARD STEAMSHIP

This is an allegorical float of the first Cunard steamship, the Britannia, which in 1840 made its maiden voyage from Liverpool to Halifax, and inaugurated the first steamship service across the Atlantic. This float represented the Cunard Line in the recent pageant given before the princes, Premier and Mrs. Baldwin, at Ottawa, at the conclusion of the World's Poultry Congress. The pageant was held in honor of the delegates to the Congress, who came from all parts of the world.

## SUNDAY SCHOOL LESSON

OCTOBER 2

### ELIJAH ON MOUNT CARMEL

Golden Text: "Choose you this day whom ye will serve."—Joshua 24:15.  
Lesson: 1 Kings 18.  
Devotional Reading: Psalm 115:1-3, 9-11.

### Explanations and Comments

**I. Elijah's Meeting With Ahab, verses 1-20.**—After three years of severe famine in Samaria because of the drought, Ahab called Obadiah, his superintendent, and told him to go in search of water for their perishing horses and mules. He was met by Elijah, who ordered him to inform Ahab that rain was coming. Ahab came to meet Elijah. "Thou troubler of Israel!" were the king's angry words of greeting. Boldly Elijah retorted that the king was the real troubler of the nation, for he had forsaken the commandments of the Lord and had followed the gods of Jezebel.

Thus even in ancient days the age-long dispute continued among contending factions assigning to one another the responsibility for evils among God's people. In Christ's day it was the charge of the Pharisees that he troubled Israel with teachings that were subversive of the traditions of the elders. With passing generations the expression of bigotry changes; the spirit of anti-Christian intolerance and bigotry, however, is constant. The most effective way to meet error is the restatement of truth. When 'loyalty to truth' finds expression in malicious attacks upon those holding different views, the object is frustrated."—Record of Christian Work.

Then Elijah ordered the king to assemble on Mount Carmel all the priests of Baal and of the Asherah. The king did the prophet's bidding.

### Old Popular Pastime

#### May Be Revived

**Throwing Horseshoes Not Expensive and Tests One's Skill**

The good old game of throwing horseshoes is being revived and bids fair to become one of the most popular pastimes of the day.

Votaries of the game will be interested to learn that the world's record for women was broken at Bloomington, Illinois, when Mrs. Latham, former world's champion, pitched six consecutive double ringers, beating the former record of five and making an average of 832 points in one game.

The game of horseshoes is neither strenuous nor expensive, yet furnishes plenty of opportunity for testing one's skill and judgment along its own peculiar lines. So, if you are not in the golf class, try horseshoes.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

### Reaper-Thresher Machines

Reaper-thresher machines are being introduced throughout the Brandon district. One company carried over 54 machines from last year and brought in 275 additional this year, nearly all of which have been shipped out to farmers. The majority are going to Saskatchewan with a number to Alberta.

## Why Suffer from HEMORRHOIDS? (Piles)

Quick and positive relief is available through the use of Anusol Suppositories.

Your physician will tell you that there is no safer or better non-surgical treatment of Piles. The use of surgical attention is often obtained through the healing effect of these remedial Suppositories.

Half a century of success in the treatment of Hemorrhoids (Piles), is your assurance of good results. Ask your druggist. Or write us for one dozen, postpaid, \$1.50. Canadian & Foreign Agency Company, 1015 Building, Montreal.

## ANUSOL SUPPOSITORIES

### Vastness Is An Asset

**Canada Has Bridged Gaps That Were Obstacles To Nation-Building**

In days gone by, Canada's vastness was a drawback and a liability. At one time it seemed almost impossible that a country of such wide-spread territory could be moulded along national lines. The terrible gaps between centres of population, the wilderness of the north country, the forbidding mountains of the far West, all loomed as obstacles to nation-building.

But the gaps were bridged, the wilderness pierced and the mountains crossed or tunneled. Canada's vastness is now an asset. In this great country almost every natural resource may be found. And there is room for all our people and many millions more.

Some day, many wise thinkers believe, Canada will be the centre, the chief nation, of the British Commonwealth of Nations. Many stranger things have come to pass.

### Device For Typing Music

**New Machine Would Greatly Facilitate Work Of Composers**

A machine by which composers will be able to type down their musical ideas in one or several copies, as easily as a letter is written by typewriter, has just been perfected by Lajos Viragh, a retired postal director. The model of the machine on which Mr. Viragh has been at work for three years, is constructed of wood and rubber, and should the manufactured machines prove as satisfactory as the model, the work of composers and those obliged to read manuscript music will be enormously facilitated.

### Looks Like Extermination

The 4,000 sportsmen who made returns to Saskatchewan gamekeepers department last year secured a total bag of 100,000 duck, 26,000 prairie chicken, 6,000 ruffed grouse, and 3,200 geese. In order to obtain some idea of the approximate bag of all hunters it is to be assumed that 12,000 who did not make returns secured the same average bags.

## In the Woods

Hunters find Minard's an excellent remedy for sprains, cuts and wounds. Pack a bottle in your kit.

**A BROKEN-DOWN SYSTEM.** This is a condition (or disease) to which doctors give many names, but which few of them really understand. It is simply weakness—a break down, as it were, of the vital forces that sustain the system. No matter what may be its causes (they are almost numberless), its symptoms are much the same: the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as this succeeds the day this may be more certainly secured by a course of **THE NEW FRENCH REMEDY, THERAPION No. 3** than by any other known combination. So, safety as it is taken in accordance with the directions accompanying it, the patient's vitality will be restored **THE EXPIRING LAMP OF LIFE LIGHTED UP AGAIN.** and a new existence imparted in place of what had so lately seemed worn-out, used up, and valueless. This wonderful medicine is suitable for all ages and conditions and is, in either case, and is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative force, which is destined to restore vitality to every one who has preceded it for this wide-spread & numerous class of human beings. Sold by leading Chemists, or either by return mail from Dr. Lucien M. G. Mervin, 22, N. W. London.

# PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

## CHAPTER VIII.—Continued

"I do pray," said Helmi, in her own defence "but not loud, just me and God know. I don't like big row — neither does my God."

After that the matron tried giving Helmi more than her share of work, but that plan was soon abandoned. Work melted before Helmi's clever hands. Then came isolation. Helmi's heart was so hard she could not have her meals with the other girls. Helmi bore this complacently. Anything better than having the whole roomful staring at her.

Helmi had four happy hours each day, four hours that slipped by her on shining wings, when the dining-room table was cleared and lessons were given by Miss de Forest. Always Miss de Forest smiled when she looked at Helmi, and called her "dear." She praised her neat, clear writing, and gave her a beautiful shiny-backed note-book with green lines in it for her own. Miss de Forest did not live at the Home, but came each day in her little car, her coming and going being events in the drab lives of the young prisoners to whom she came as an ambassador from a happier world.

To the Matron, Miss de Forest went one day with something weighing heavily on her mind. Mrs. Wymuth was in her "Retreat," and looked up questioning when the teacher entered.

"Mrs. Wymuth, this system is all wrong," began Miss de Forest, impulsively. "This young Finn girl who has just come in is as sweet and innocent as a rose, but she has to associate with all classes here. Rose Lamb has just come back from a terrible debauch, and she is full of the glory of her adventures—she knows every dive in the city. Lucille's baby is about due. Minnie is in the same condition, and the others are learning just any wickedness they did not know. Many of these girls are mentally deficient. Certainly this is no place for a bright, lovely young girl like Helmi. I always have thought it poor system, but since Helmi came it seems positively devilish."

Mrs. Wymuth's lips were thin as she replied: "We have nothing to do with the system, Miss de Forest; that has been carefully thought out by the Board. You forget that under the softening influence of Divine grace, the hardest hearts may melt. Rose Lamb has had a wonderful conversion since she was brought back, and is a better girl this moment than Helmi with her proud and stubborn will. Rose is a brand plucked from the burning; Helmi is still a sinner."

Miss de Forest protested stormily. At the end of the month Miss de

Forest was dismissed. The letter from the Board said "It was deemed advisable to make a change."

During the rule of the former matron the hospital room was downstairs, located as far as possible from the dormitory. The Wymuths had other plans. They believed it was well for the girls to know the wages of sin. So on the dreadful night that Lucille spent in hospital, the girls huddled together in agony, listening, listening. Poor Lucille, with her shining brown girls! Every girl but Rose Lamb cried in sympathy, and some in shrieking terror. The new girl who had come in that day came over to Helmi, who held her in her warm young arms all night. Like a stone she was, poor little Esther. Her teeth chattered and her little heart beat wildly like a hunted hare's. Helmi did her best to comfort her.

Rose Lamb alone was calm. She sat up in bed and addressed the girls. "See here, kids," she said, "Lucille was a big fool, and it serves her right. She didn't need . . ."

The girls hushed their sobs and listened fascinated. Helmi covered her ears. Something inherently modest and clean in her young heart protested. She did not want to hear.

The Girls' Friendly Home had been built by Christian people. The men who sat on the Board were convinced that they were doing a noble thing. Faithful women sewed and baked and sold tickets to maintain it. O God! O God! what cruel things are sometimes done in the name of Thy Compassionate Son!

It was over Minnie that Helmi had her first quarrel with Mrs. Wymuth. Minnie's home was in the country, where the crops had failed, and Minnie had come to the city to find work. There had been no harvest to cut, so it seemed best for Minnie to come away. Only sixteen, innocent and trusting. Minnie had come to the great city. She wanted money to get shoes for the little ones at home, and for her mother, too. Minnie's love for her mother was very deep and beautiful. Her mother had been so brave and sweet through all their bad years.

Minnie had worked in the home of a prospector, a man who had found gold in the north—gold running in the sands of a river—and he had traced it back until he found the deposits. He would be the richest man in the world some day. His wife went to the coast for the winter. "He told me," sobbed Minnie, "that he would stake a claim for me, and I would have thousands of dollars, and that I could do what I liked with it. I could pay off the mortgage and give my mother a trip. But only on condition that I wouldn't tell, and so I didn't tell anyone. The other matron, Mrs. Avery, was lovely to me, and told me if the time ever came when I wanted to tell she would stand by me. She explained to me how foolish and wicked I had been, but she knew I was love of my mother and all of them at home. Oh, we would have been all right if she had stayed."

"She helped me to write a letter to my mother, and wrote herself so nice, too. It made me cry. That was just before they told her to go. I have her address—she gave it to all of us. Mrs. Wymuth made me burn my card, but I know it, anyway—she can't take that from me." She reads all the letters we write, and all the letters that come. Mrs. Avery never did that. But Mrs. Wymuth made me tell—she prayed it out of me. One night I got excited and said his name and now even if he finds the gold he'll be mad at me and never give me a cent."

Helmi patted the poor girl's heavy-laden shoulders. "But that's not the worst—I haven't got my mother's letter, and I believe there is one from her. I asked Mrs. Wymuth, and she said I would get it when I was a better girl and stopped crying. I said I couldn't stop, and then she said I was saucy and she would punish me for that; and I said a letter from my mother would do me more good than anything. She said I would get my letter when she saw fit to give it to me and not before. I wish I could die—I hope I will die when my time comes."

"No, no," said Helmi, "don't die, Minnie! I'll get your letter if it is

We are so sure you will appreciate perfect tea in perfect condition that we make this offer. If you buy Red Rose Tea in the new aluminum package and you are not thoroughly satisfied, we have authorized your grocer to return your money on receipt of the container, no matter how much of the tea you have used.

there. I'll take it. It is yours, and it is not hers."

"They will kill you—they thrashed Rose Lamb for running away—thrashed her right before us all. It was terrible."

The next night when supper, which was always eaten in silence now, was over, the prayers began. Mr. Wymuth read the scripture, choosing a denunciatory psalm abounding with much malediction and woe. He spoke of Lucille, and drew a moral lesson from her sad story and her terrible suffering. According to Mr. Wymuth motherhood was the punishment which came to those who transgressed the laws of propriety (Miss Lamb dissenting, though not openly). The girls were strongly disposed to follow Miss Lamb's theory that it was not sin, but innocence, that had been Lucille's undoing.

Then came the avalanche of prayers, led most noisily of all by Miss Lamb. Some of the other girls followed, and Mrs. Wymuth as usual closed the meeting. She had a way of tattling on all the girls, telling God everything she had noticed all day that was in any way unpleasant. "And oh, dear, gracious God, we ask Thee to forgive Mary, who came to the table tonight with filthy hands. Teach her that clean hands are pleasing in Thy holy sight. And soften Helmi's hard heart, dear Lord, we pray. Oh, bring down conviction like a rain of fire, so that her poor sin-stained soul may not be eternally lost and cast away to burn forever and ever. Teach Minnie to know that authority must be respected."

Mrs. Wymuth's eyes were devoutly closed as she said back and forward to her own intoning. Her voice whimpered and wailed and rasped like a rusty hinge.

(To Be Continued.)

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

## Alberta's Coal Wealth

Greater Than All Known Deposits in the British Empire

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, according to Sir Thomas Holland, chairman of the Empire Mining and Metallurgical Council. "If the present endeavors to change coal into a fluid fuel, capable of displacing petroleum and all its products, are successful, Canada will take the place of the United States as the world's provider of liquid fuel," he further stated.

Minard's Liniment for Toothache.

There are several countries in which a census never has been taken. They are: Persia, Afghanistan, the Indo-Chinese peninsula, half of Africa, parts of South America and most of China.

## PIMPLES AND ERUPTIONS

On Face. Looked Awful. Cuticura Healed.

"My face broke out with pimples and sore eruptions. They did not trouble me much until about six months ago when suddenly they became large and red, and I could not sleep at night for the terrible itching and burning. I could not go out; my face was awful."

"My mother read an advertisement for Cuticura Soap and Ointment and I sent for a free sample. I purchased more, and when I had used three cakes of Soap and three boxes of Ointment I was healed." (Signed) Basil Lee, 60 Gannett St., London, Ont., Sept. 1, 1926.

Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses. Sample each free by mail. Address: Canadian Agents, "The Canadian Soap Co., Ltd., 100 St. George St., Toronto, Ont. Cuticura Shaving Stick 25c.

## Free Books For Blind

Canada's National Institute For Sightless Distributes Thousands Of Volumes Monthly

Just twenty years ago a library for the unfortunate army of the sightless, who must read with their fingers, was established in Toronto. Now the library department of the Canadian National Institute for the Blind distributes 1,000 bulky volumes a month to blind persons in all parts of Canada and in Newfoundland.

This library is unique in Canada, being the only one with more than merely local distribution. Books supplied cover every range of literature, from geology to poetry. History, biography and scientific works are in great demand, and the librarian believes that the sightless consume a relatively greater quantity of this solid fare than those who read with their eyes.

Canada can claim a highly creditable distinction in that it was the first nation to grant free transportation through the mails to embossed literature. This step was accomplished in 1908 by Sir William Mulock, now Chief Justice of Ontario.

Its vast importance can only be comprehended when the weight and bulk of an embossed book is considered. It requires thirty-nine Braille volumes to accommodate the Bible. An ordinary Bible can be purchased for 25 cents; the price of the Braille Bible is \$22. Gibbons' "Decline and Fall" requires nearly twelve feet of shelf space and is so popular it is never on the shelves. There is no library fee for the blind reader, and no matter where he lives in the Dominion, the books he wants are sent free of charge.

## Insist On Silent Cars

English Police Ordered To Punish Motorists Making Unnecessary Noise

Active warfare against drivers of motor cars throughout the country who make more noise than is necessary in the driving of their cars has been instituted by the police under expeditious orders from the home office.

A little over a year ago the home secretary, Sir William Joynson-Hicks, issued a warning against motor drivers who failed to use silencers in connection with the running of their cars, and since then nearly 6,000 prosecutions have been made in the metropolitan police district alone. The improvement resulting therefrom, however, is deemed insufficient by the home office and now the warfare is to be prosecuted with still greater vigor, not only in the metropolitan district, but in the country generally.

**It Has Many Qualities.**—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

## Little Helps For This Week

His secret is with the righteous. Prov. iii. 32

Ah! If our souls but poise and swing Like the compass in its brazen ring. Ever level and ever true, To the toll and the task we have to do.

We shall sail securely and safely reach The Fortunate Isles.

—Henry Wadsworth Longfellow.

The desire to do right, the will to do right are not of ourselves, but of the Lord. He stands ready to give all these in their fulness to all who will receive them.—Theodore Parsons.

## Brains and Intelligence

Quality That Counts and Small Brain No Handicap

There is no evidence that the size of the brain has anything to do with intelligence. Men are larger than women, therefore they have larger but not necessarily better brains. Turgeneff, the Russian novelist, had an exceptionally large brain, only exceeded by two others; one of the others was an imbecile. Next in weight came a laborer and a bricklayer. The largest woman's brain recorded weighed 1,742 grams; she was insane, and died of consumption. A small brain is no more of a handicap than a small foot. It is quality that counts.

Minard's Liniment for Lumbago.

## Spasmodic Croup

Often checked with one application of Vicks. Just rub on throat and chest.

**VICKS**  
VAPORUB  
OVER 17 MILLION JARS USED YEARLY

## Farm Prosperity

Increasing Sale Of Agricultural Implements Reported In West This Year

An unfailing indication of farm prosperity is the increasing sale of implements reported by nearly all dealers in the west this year. The demand for haying machinery has been especially heavy, while the sale of threshers, binders, combines and tractors has been exceptionally large. Some firms reporting from 100 to 200 per cent. increases in the sales of these implements.

## THIS GREAT TONIC RENEWS STRENGTH

Simply Because It Enriches and Builds Up the Blood

In no trouble is delay or neglect more dangerous than in anaemia, which means poverty of the blood. It is very common in young girls and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is often well developed before its presence is recognized. But taken in time there is a tonic that so enriches and purifies the blood that good health and strength soon comes to the former weak, anaemic sufferer. This tonic is Dr. Williams' Pink Pills, which for years have been the most successful blood-builder known, and have credit for restoring to good health thousands and thousands of people who have suffered from some of the many ailments that come through weak, watery blood.

The correction of anaemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. As proof of this Miss Margaret A. Smith, Burgoyne, Ont., says:—"After having a severe attack of jaundice I was left in a very weak and run-down condition. I was pale and my nerves on edge. I could not sleep at night and would toss and turn for hours at a time. I finally decided to try Dr. Williams' Pink Pills, and soon began to feel better, and after taking a few more boxes of the pills I felt as strong as ever, and could thoroughly enjoy my rest at night. Now, I always recommend these pills to any friends who may be ailing."

Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin them today. Sold by all medicine dealers, or by mail post paid at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Judge—"Madam, have you anything to say?"

Prisoner's Husband (excitedly) — "Now you've done it."

A great man is seldom taken at his true value but lots of others will sell out for more than they are worth.

## Does Weakness Detract From Your Good Looks?

—Photo by Miekeltwaite

Mrs. Thomas Chapman of 3 Somerset Place, Toronto, Ont., whose picture appears here, said: "Dr. Pierce's Favorite Prescription was very helpful to me and I know it to be the very best medicine a woman can take when nervous and run-down. I had a break-down—my nerves were so upset I could not sleep. I also suffered from nervous indigestion, but after taking Dr. Pierce's Favorite Prescription I did not suffer with indigestion and I could get a natural night's rest, which I could not do before. No woman can appreciate what a wonderful medicine the 'Favorite Prescription' is until she gives it a trial."

All druggists. Tablets or liquid. Write Dr. Pierce, Pres. Invalids' Hotel, Buffalo, N. Y., for free advice.

## AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Colborne, Ontario.—"When I was first married I was very thin and weak. The doctor said I was weak and would never be able to have a child, but I did, and from the time my baby came I suffered all the time and doctored and took medicine. Life became a burden, and doctors said an operation could help me, but my husband was opposed to that. I had seen Lydia E. Pinkham's medicine advertised, so I told my husband that I thought I would try it, that I might get some relief. I had not taken one bottle when I could feel it helping me. I took five bottles and had better health. Now I have three girls and a boy and have done my work up to confinement. I am now at the change of life and owe my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle when I think I need it."

—Mrs. SUSAN DAYMAN, R. R. No. 5, Colborne, Ontario.

Sold by druggists everywhere.

## Church Announcements

### EVANGELICAL NOTES.

Hoping that the ban for infantile paralysis will be lifted soon, Rally Day will be observed in the near future. September is the regular month for this observance, but circumstances forbid it this year. Watch next week's announcements for further particulars.

The boys and girls have recently been made conspicuous by their absence from the S.S. and church during the last three weeks. This has helped many to see, as never before, how big and important a place they fill in our church life when all are in attendance.

### KNOX and WESTCOTT

Sunday, October 2nd—The Minister is taking as his theme, "The Perils of Routine." One of the greatest men in history refused to change his thinking or enlarge his views, and the day came when he was faced with a crisis. It is an experience that comes to everyone whose growth in life is true. The sermon will be helpful in promoting spiritual growth.

Community Hall—Services October 2nd at three p.m. All are invited.

### ST. CYPRIAN'S

(Church of England)  
Priest-in-charge, Rev. H. Clay,  
Box 157, Olds.

First Sunday in the month—Afternoon at 3.00 p.m.

Third Sunday in month—Morning at 11.00 a.m.

School is held every Sunday.

### LUTHERAN CHURCH

Due to a meeting to be held in Westcott there will be no services in Didsbury Sunday afternoon. Services will again be held the week following.

Services at Westcott will be held at the usual hour of 10.30 (German). Holy Communion will be celebrated at this service.

### INFANTILE PARALYSIS HELPFUL SUGGESTIONS

(Issued by the Metropolitan Life Insurance Co.)

Infantile Paralysis is a germ disease. It occurs most often in the summer months, and mostly among children, especially those under five years old. Following the advice given in this pamphlet will help your children escape this disease.

Infantile Paralysis in its beginning resembles many other contagious diseases. A child that has been perfectly well becomes restless or drowsy. He is irritable and does not want to be moved. There may be vomiting or diarrhea, but constipation is the rule. There may be some headache or pains in the muscles. At times, a convulsion occurs. The child is feverish. That is all that appears, and yet within 24 to 72 hours, the child may not be able to move its arms or legs.

Do not wait for the paralysis. If the child appears to have fever, vomiting and marked restlessness, put him to bed and call a doctor promptly. No matter how mild the sickness may seem, get a doctor's advice. Do this to protect your child. While waiting for the doctor give the child a dose of castor oil. Keep all the other children away until the doctor says there is no danger.

Every case of Infantile Paralysis should be reported immediately to the Department of Health. Follow the advice of your Health Officer who is working to protect your home from Infantile Paralysis and all other contagious diseases.

#### Constant Care of Children

Keep your children clean. Bathe them often. Make them wash their hands and face before eating. Do not let them use public roller towels.

Give each child his own handkerchief. Teach him to blow his nose and to cover the nose and mouth when he sneezes or coughs. Teach him to keep his fingers out of his nose and mouth.

Give each child his own toothbrush. See that he uses it morning and night. Keep the teeth clean and have the cavities filled.

## ATLAS LUMBER CO.

Come on! Let's go.

## W. J. HILLYARD

Phone 43.

Didsbury

Teach him never to use a cup or a glass that has been used by some one else.

Give the child plenty of water to drink. Forbid all tea and coffee.

Food should be simple and easily digested. Give no fried foods.

Use clean, pasteurized milk, or milk from cows tested regularly for tuberculosis.

Put the children to bed early. Younger children should have a nap after lunch.

Be sure that the children's bowels are regular.

Do not use patent medicines. Bags of camphor or asafetida are useless. Beware of the dishonest advertisements of quacks who are interested in your money, but not in your children.

#### If Infantile Paralysis Is Near

If there is an epidemic of Infantile Paralysis, keep your children away from crowds. Avoid the movies, theatres, parties, dances, picnics and crowded boats and trains. Keep your children away from homes where there is sickness. Infantile Paralysis is spread largely from one person to another.

If you have a yard, let your children play in it. The roofs of apartment houses are fine playgrounds, if no sick children are there.

Keep your house as clean as you can. Use plenty of soap and water. Burn up rubbish. Fight flies, roaches and other insects. Sinks must be free from the remains of food. Garbage buckets should be tightly covered and cleaned daily. Do not leave food uncovered between meals.

Fresh air and sunlight are nature's best destroyers of germs. Keep windows open in the bedrooms during the night, and air the rooms thoroughly during the day.

#### Care of the Paralyzed Child

If your child has had Infantile Paralysis and is paralyzed, ask your doctor what can be done to strengthen the weakened muscles and nerves. Proper care and treatment may prevent your child from remaining a cripple for the rest of his life. Often much can be done to bring back his health, usefulness and happiness.
